VILLA CANNES: A Jewel of Design in the Hills of Cannes Exploring the latest interior design project signed by Nembo Design Studio, in collaboration with Henge, VILLA CANNES emerges as an authentic gem nestled in the hills of Cannes.

The design philosophy behind this residence, which enjoys a panoramic position with breathtaking views of the bay, pursued the goal of creating an authentic connection between indoor and outdoor spaces. Large, minimalist-framed windows ensure the view can be enjoyed year-round, removing any barrier and establishing a genuine connection with the outdoors.

The panoramic view of Cannes provides the property's most stunning scenery. The large windows and 5-meter-high ceiling allow for extraordinary brightness and convey a sense of exceptional volume, maintaining a feeling of spaciousness and expansive open spaces. The staircase features a glass parapet and steps made of "Briccola Wood", which are wooden poles from the Venetian lagoon that were traditionally used for navigation by sailors. This staircase was custom-made for the project and designed to allow natural light to flood the surrounding spaces with its transparency.

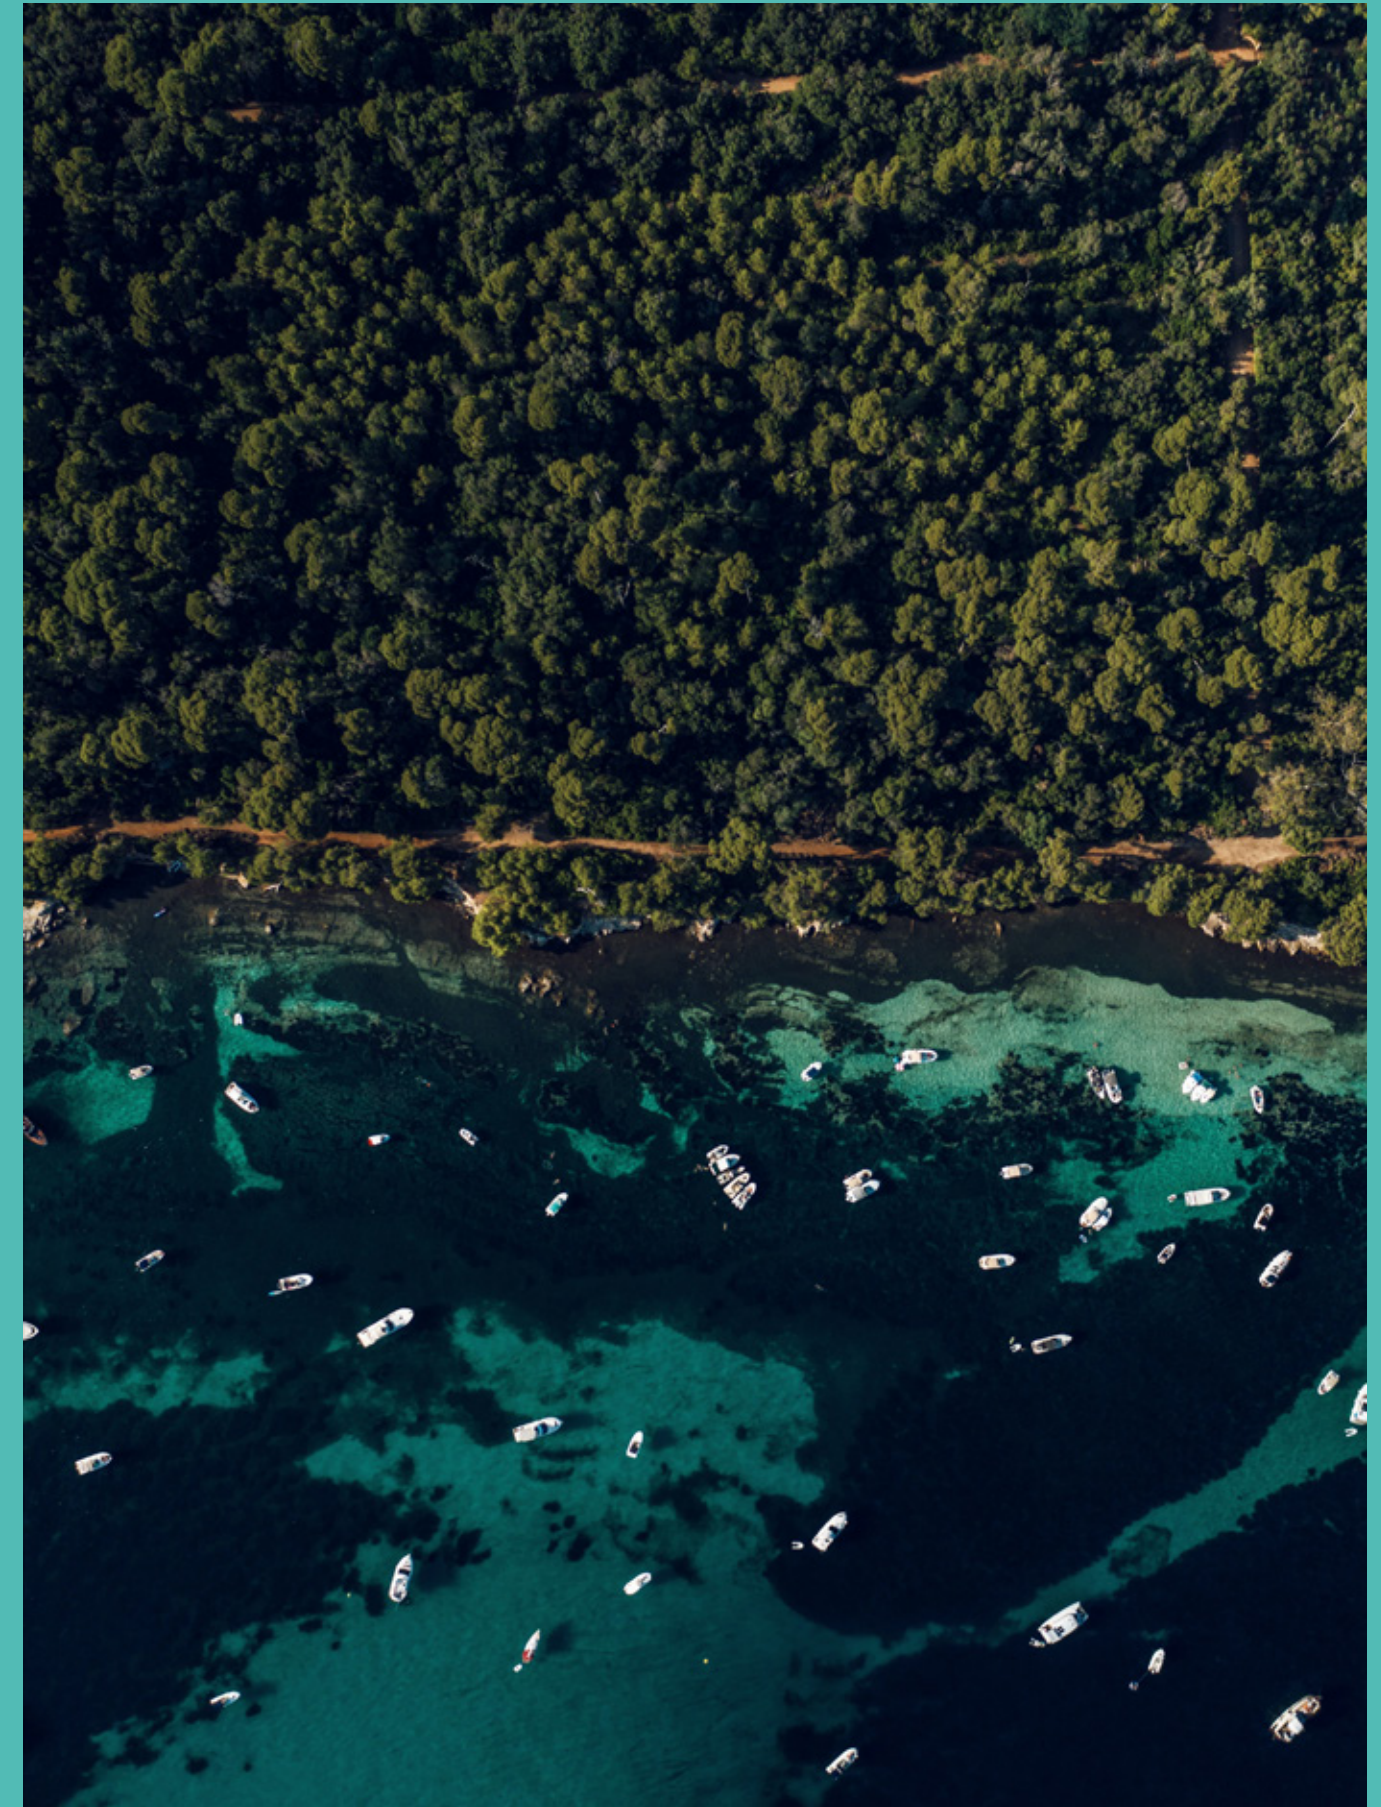

The furnishings and decorations throughout the house have been carefully selected to ensure a consistent style in every corner. From the master bedroom to the gym, every element has been crafted with a cohesive spirit, using materials, colors, and finishes that complement each other.

The design maintains understated elements with a high level of coordination, creating a comfortable and welcoming atmosphere. The master bedroom features custom-made wall panels and a fully customized wardrobe wall with leather doors, optimizing the available space.

The meticulous harmonization of the primary materials – wood, stone, and metal – was pivotal in the project. Noteworthy examples include the use of limited-edition onyx, such as STR Onyx for the Synapse table, swamp oak retrieved from centuries-old trunks found in marshy areas, and Briccola Wood. Moreover, the metals, featuring hand-made finishes and oxidations, are a distinctive detail of HENGE, imparting a unique and exclusive touch to every space.

Villa Cannes is a luxurious home that exudes refined elegance and serves as a haven for owners and visitors looking for a year-round wellness experience. The villa is seamlessly incorporated into the lush greenery of the garden and boasts a breathtaking view of the sea. It strikes a perfect balance between the tranquility of nature and the sophistication of contemporary design, making it a metropolitan and cosmopolitan retreat that is exclusive in every sense.

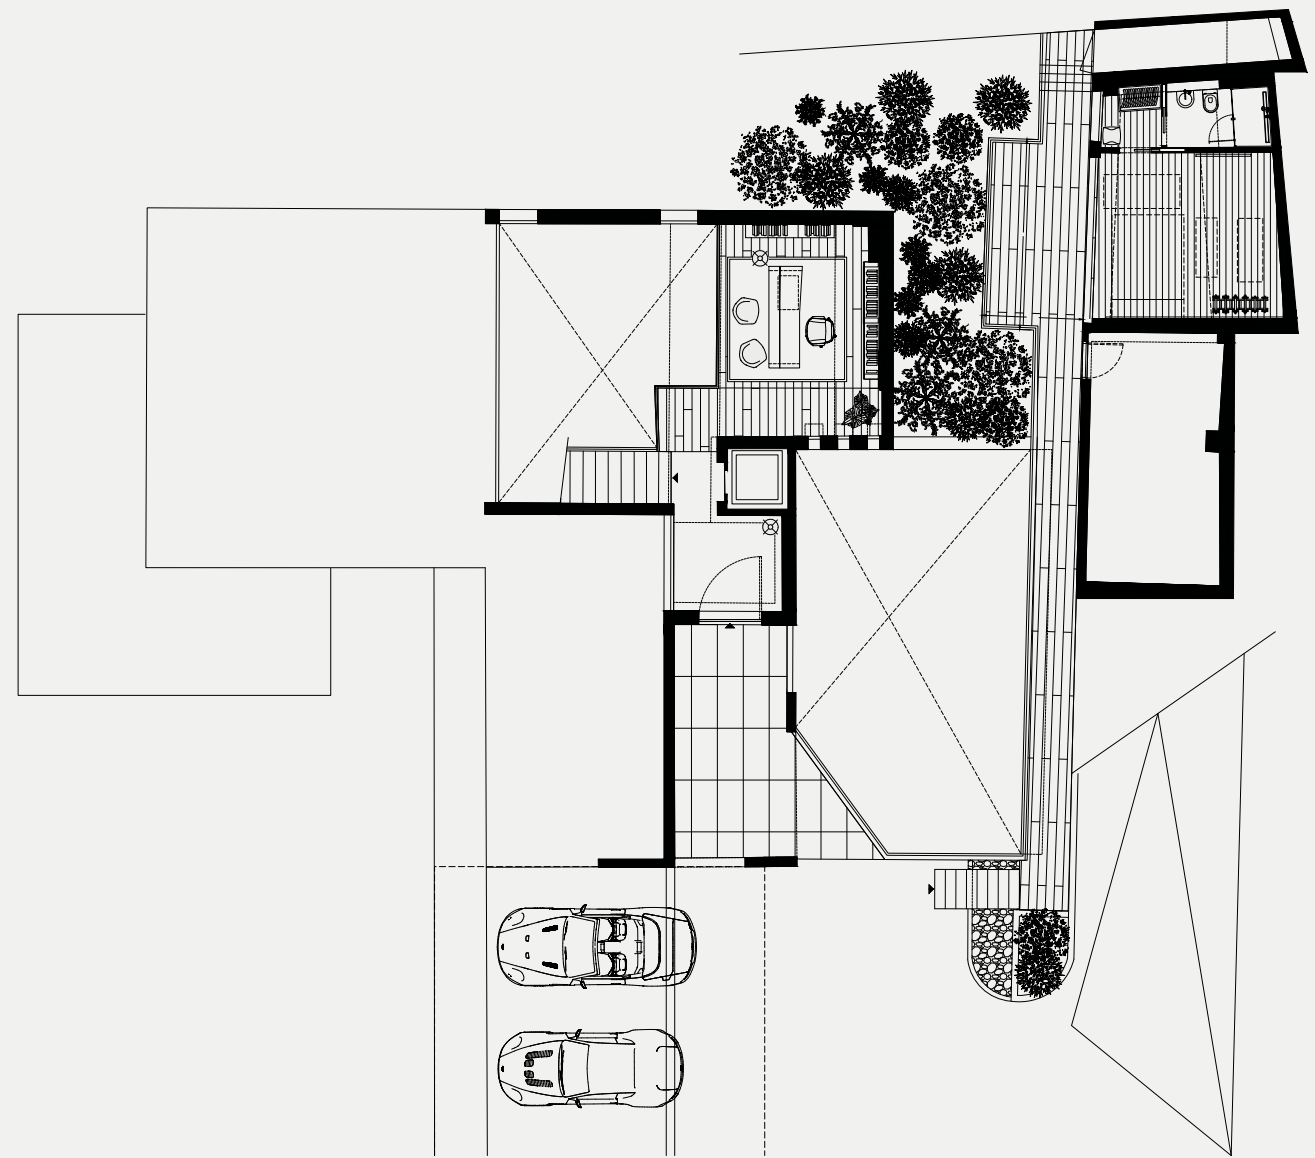

Within the confines of this singular image, the Linejust boiserie by Henge takes center stage. Its finely crafted woodwork weaves a tale of sophistication and precision, acting as both a focal point and a subtle backdrop to the curated interior. Each panel exudes a timeless charm that plays a pivotal role in creating an atmosphere of quiet opulence.

Crafted to perfection, the cabinet doors coated in supple leather redefine the concept of bespoke design. The texture and richness of the leather create a tactile experience, transforming the master bedroom cabinet into a sanctuary of style. The attention to detail extends beyond functionality, encapsulating the essence of personalized luxury. Elevating the design narrative further is the Bistrot Bookcase—a custom element that graces the top of the walk-in wardrobe, completing the master bedroom's visual symphony. This bespoke bookcase, with its intricate detailing and artisanal craftsmanship, not only serves as a functional storage solution but also adds a layer of sophistication and character to the space.
