Soft and fresh

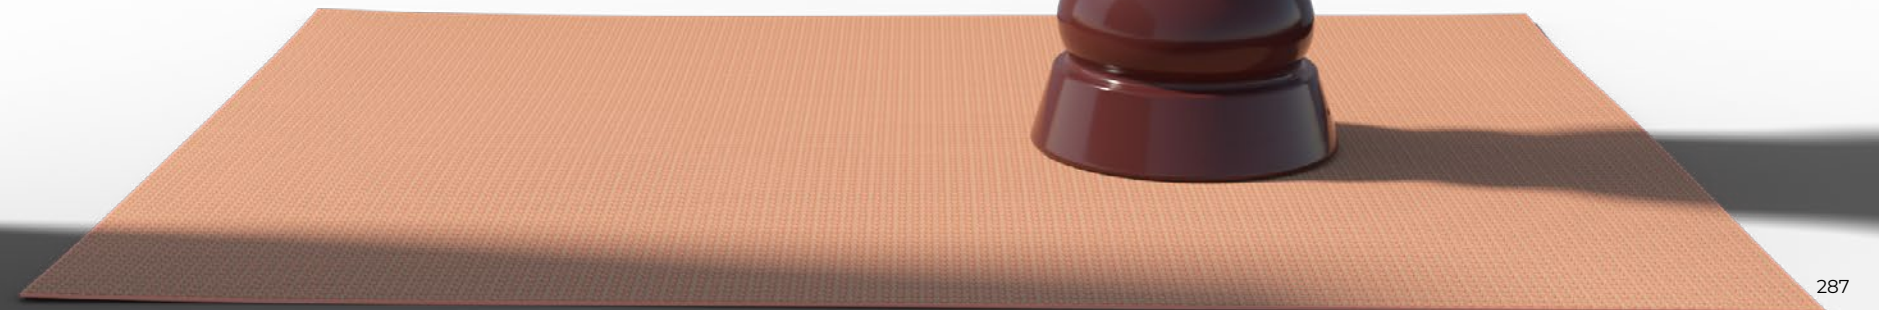

At Vondom, we continue to innovate and develop new techniques to come up with new and cutting-edge products.

The result of these efforts is brought to life in outdoor rugs made from recycled plastic. These rugs are made for the outdoors; as they have UV treatment incorporated, they resist water and high temperatures, and they are also easy to clean and maintain. They are the perfect decorative complement; adding a warm and cosy touch to wherever you place them.

Social welfare

Sustainability is the key to the materials and complements choice. Our fabrics and rugs now contain recycled plastic fibers that contribute for a more sustainable future.

From our philosophy, under the name of Vondom Revolution, we are working for our creations, and all that around us, do not compromise the capacity of the future generations, and allow a balance between the economic growth, the environment and social welfare.

Recycled plastic

RUG TYPE 1 / COLOR - ERAS 61003

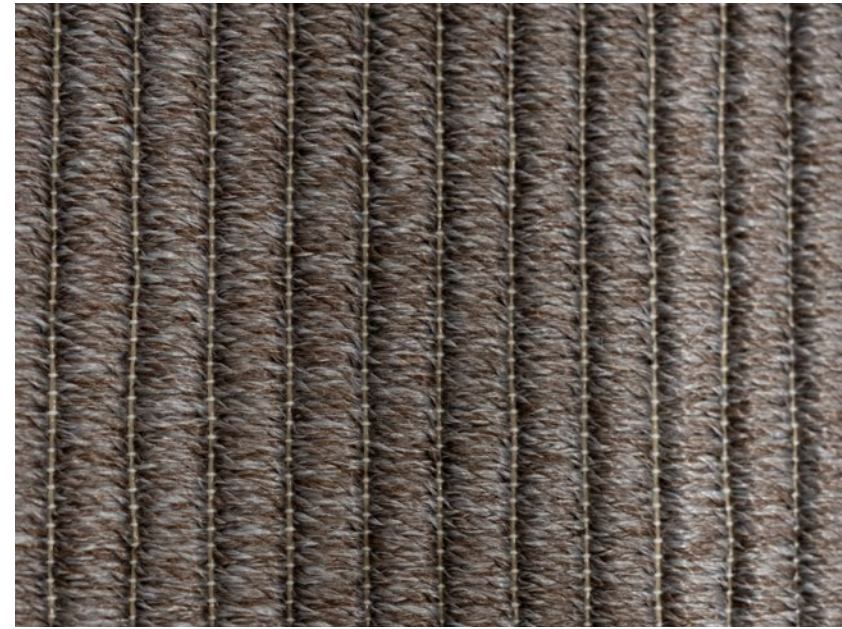

Once again, the use of plastic fibres recovered from the oceans is part of our journey towards a more sustainable future. This time, we've used more than 130 plastic bottles for every square metre of rug. This is our grain of sand to help the marine ecosystem and the environment.
